GENERAL INFORMATION

The general information and instructions set forth below should be read carefully by all users of this publication.

Purpose and Contents.—This publication is designed to serve American industry in several ways. It contains the “Product Assignment Directory” (section I) which indicates the particular Industry Division within the Business and Defense Services Administration (BDSA) from which economic, statistical, technical, and other information may be obtained for many products of our economy.

Section II contains the Official Class B Product List which is part of the Defense Materials System (DMS) which supports production, construction and research and development for defense, atomic energy and space programs.

This publication also supplies background material regarding some of the important features of the DMS, and reprints in section IV some portions of the DMS Regulations for the convenience of the reader. The following definitions are taken from DMS Regulation 1.

Definitions.—“Controlled Material” means domestic and imported steel, copper, aluminum, and nickel alloys, in the forms and shapes specified in Schedule I of DMS Reg. 1, whether new, remelted, rerolled, or redrawn. The allocation of these basic materials is the Government’s administrative means for achieving a balanced flow of *all* materials to maximize industrial output to meet wartime objectives. This “standby” capability represents one of the important aspects of the Defense Materials System and complements its peacetime objectives of maximizing production, construction, and research and development for current defense, atomic energy, and space programs. A current list of all controlled materials is contained in section IV-A of this publication. Any subsequent amendment of Schedule I of DMS Reg. 1 supersedes section IV-A.

“Class A product” means any product which contains any controlled material and which is not itself a controlled material or a Class B product. It also includes a construction project or research and development which requires for its completion any controlled material or Class A product. A partial list of Class A products for military use is contained in section IV-C.

“Class B product” means any product designated as such in the “Official Class B Product List” issued by BDSA (section II of this publication), as the same may be modified from time to time, which contains any controlled material. It also includes any service designated as a Class B product in said “Official Class B Product List” (such as plating metal products) whether or not such service employs, consumes, or requires any controlled material.

The designations “Class A product” and “Class B product” do not signify relative importance. During the peacetime operation of the Defense Materials System the distinction between Class A products and Class B products is essentially a procedural one. The maintenance of this distinction is a matter of extreme importance, however, since the classification of these products reflects the channel of responsibility and authority for the allocation of material and authorization of production or construction during wartime.

Special treatment of certain items are described below:

1. All concurrent spares and all repair and replacement parts for Class B products are to be treated as Class B products.
2. Unless specifically excepted by BDSA, repair and replacement parts for Class A products are to be treated as Class A products if they are not listed as Class B products in the Official Class B Product List.
3. All screw machine products and stamped, spun, and pressed metal products produced to order by job shops are treated as Class A products. However, any of these products manufactured by such job shops which are sold by them from their catalogs or stock are to be treated as Class B products.
4. Components classified as Class B products which are made by a producer of any Class A product for incorporation in such Class A product are to be treated as Class A products, unless the producer normally makes similar components for sale.
5. Tools, jigs, dies, and fixtures classified as Class B products which are made for his own use by a producer of Class A products are to be treated as Class A products, unless the producer is a regular manufacturer of such tools, etc.

Product Assignment Directory.—Section I of this publication is the Product Assignment Directory. It contains an alphabetical list of a broad variety of products and certain services. It includes Class A products, Class B products, controlled materials and other products which do not fall into any of these categories. It shows the area of responsibility of the Industry Divisions of BDSA with respect to the items listed.

The listings in this Directory were developed over a period of years taking into account the experience in World War II, the Korean conflict, new product developments, and the record-keeping practices of industry. They are generally consistent with the Standard Industrial Classification of the Bureau of the Budget. They cover all eco-

nomically significant products manufactured in the United States except petroleum, gas, solid fuels, certain minerals, agricultural products, and services.

Official Class B Product List.—Section II of this publication is the Official Class B Product List. It is part of the Defense Materials System and should be used in accordance with the provisions of DMS Regulation 1. It incorporates the latest changes in classification and product assignment. This list may be amended from time to time.

All categories of Class B products are listed in the Official Class B Product List; however, not every possible description is included under each category. Services designated as Class B products are also listed. For each listed item there is shown a product class code number, description, and the BDSA Industry Division to which it is assigned.

The word “Civilian” following a product name denotes that the item is civilian type rather than civilian purchased.

The word “Military” following a product name denotes that the item is of special military design rather than military purchased.

The letters “N.E.C.” following a product name means “not elsewhere classified.”

The official Class B Product List was developed largely from the list of products used in the 1958 Census of Manufactures by the Bureau of the Census, supplemented by significant categories of Class B products not separately shown in the Census. The 5-digit product class structure of the Bureau of the Census, which conforms to the 1957 edition of the Standard Industrial Classification, was expanded to a 6-digit code structure to meet the administrative needs of BDSA. The same 6-digit code is assigned to a product class in all sections of this Directory. The individual products of which a class is comprised are all designated by this same 6-digit code. For a further description of the BDSA classification and coding system, see Section IV D below.

HOW TO DETERMINE THE CLASSIFICATION OF A PRODUCT

A product may be classified in one of the following categories:

- (a) Controlled material
- (b) Class A product
- (c) Class B product
- (d) Unclassified product

In order to determine the classification of a product, first look in section I, Product Assignment Directory, which is arranged alphabetically.

1. If the footnote (1) appears after the name of a product, the product is a *controlled material*.
2. If there is no footnote after the name of the product, note the product class code and look for that code number in section II, Official Class B Product List, which is arranged numerically. If the code is listed in the Official Class B Product List and if the product contains any controlled material, it is a *Class B product*. Some products included in the Official Class B Product List, however, are specifically designated Class A products in section IV–C because of their direct relationship to military programs.
3. If the product contains any controlled material and is not listed in the Official Class B Product List, it is a *Class A product*.
4. If the product does not contain any controlled material and is not itself a controlled material, it is an *unclassified product*.

In the formulation of this publication consultation with industry representatives has been rendered impracticable because it affects all industries and trades.

SECTION III

INDEX OF PRODUCT CLASS CODES BY BDSA INDUSTRY DIVISIONS

This section arranges the BDSA industry divisions in alphabetical order. The product class codes assigned to each of the divisions are listed below in numerical sequence. However, for some divisions, code numbers are not given to permit grouping of product classes in broader terms in order to shorten the listing and to clarify the responsibilities of the division involved.

AGRICULTURAL, CONSTRUCTION, MINING, AND OIL FIELD EQUIPMENT DIVISION

Agricultural Machinery and Equipment—AGRI

Product Class Code	Description
162100	Silos and parts.
349802	Irrigation distribution equipment.
352001	Farm machinery and equipment, n.e.c.
352201	Repair parts, tractors, wheel type, under 100 belt hp., and garden type tractors.
352202	Plows and listers.
352203	Agricultural machinery repair parts.
352221	Tractors, wheel, under 100 belt hp.
352230	Planting, seeding, and fertilizing machinery.
352241	Harrows, rollers, pulverizers, and stalk cutters.
352250	Harvesting machinery.
352260	Haying machinery
352281	Tractors, garden types, and motor tillers.
352282	Sprayers and dusters, agricultural.

353192	Construction, excavating and maintenance machinery and equipment, unit designed machinery, wheel and tracklaying tractor attachments, repair and replacement parts.
353193	Ditching and trenching machinery and equipment, and repair parts.

Mining Machinery and Equipment—MMEQ

353211	Transportation equipment, accessories, and repair parts underground mine.
353212	Specialized mining machines, equipment, and repair parts.
353220	Stationary crushing, pulverizing and screening machinery and repair parts.
353231	Ore dressing and coal preparation equipment and repair parts, except crushing and screening machinery.
353232	Mining drills, accessories and repair parts.
353502	Conveyors, accessories, and repair parts, mine type.
353612	Specialized mine hoists, accessories, and repair parts.
355956	Smelting and refining machinery and repair parts.
374101	Locomotives, underground mine, and repair parts.

Oil Field Machinery and Equipment—OFME

138100	Oil, gas, and water well drilling services only.
344351	Tanks, well head, oil field only.
353301	Subsurface well drilling equipment.
353302	Surface well drilling equipment.
353303	Exploration machinery and equipment.
353330	Oil and gas well machinery and equipment.
353341	Oil and gas well cementing, floating, guiding, and shoe equipment.
353342	Well servicing machinery and equipment, including gun perforating, acidizing, fracturing, drill stem testing and workover.
353343	Well survey machinery and equipment.

AUTOMOTIVE AND TRANSPORTATION EQUIPMENT DIVISION

Automotive Equipment—AUTO

342311	Mechanical jacks, except hydraulic.
342913	Motor vehicle hardware.
348132	Seat and back springs for motor vehicle.
349303	Springs, leaf, automotive, except locomotives.
351902	Internal combustion engines, except aircraft, over 750 r.p.m.
353401	Automobile lifts, service station type.
354841	Automotive maintenance equipment.
354842	Aircraft ground maintenance equipment.
356901	Hydraulic jacks.
359901	Carburetors, civilian type, except aircraft.
359902	Pistons (machined) and piston rings, all types.
361121	Automotive test equipment, electric.
364242	Incandescent vehicular lighting equipment.
369401	Vehicular switches and internal combustion engine electrical equipment.
369402	Aircraft electrical equipment, n.e.c.
371301	Truck and bus bodies, civilian.
371302	Truck bodies, military.
371500	Truck trailers and chassis, civilian.
371701	Trucks, truck tractors, and chassis, except off-highway, civilian.
371710	Passenger cars and chassis.
371730	Motor coaches, except trolley.
371740	Combat vehicles (wheeled tactical vehicles or carriers).
371761	Repair and replacement parts for motor vehicles.
371762	Parts and assemblies, motor vehicles (other than repair).
371763	Accessories for motor vehicles and trailers (not installed as original equipment at factory).
371764	Automotive auxiliary components (not installed as original equipment at factory).
379911	Automobile trailers, except mobile homes.
382140	Motor-vehicle instruments, except electric.

Aircraft—AIRC

372101	Aircraft, civilian.
372110	Aircraft, man-carrying, military.
372141	Aircraft modifications, conversions, repair and overhauling, civilian.
372142	Aircraft modification and conversion, military.
372201	Fuel injection systems, aircraft.
372202	Aircraft engines and parts, military.
372203	Aircraft engines and repair parts, except military.
372301	Aircraft propellers and parts, except military.
372302	Aircraft propellers and parts, military.
372911	Aircraft parts n.e.c., except military (excluding airframes and propeller and engine parts)
372912	Airframes (military and nonmilitary) and military aircraft parts, n.e.c. (excluding propeller and engine parts).

Ordnance—ORDN

191100	Guns, howitzers, mortars, and related equipment over 30 mm (or over 1.18 inches).
192100	Artillery ammunition, over 30 mm (or over 1.18 inches).
192200	Ammunition loading and assembling over 30 mm (or over 1.18 inches).
192900	Bombs, mines, torpedoes and ammunition n.e.c.
193100	Tanks and tank components.
194100	Sighting and fire-control equipment.
199900	Ordnance and accessories, n.e.c.
289201	Blasting accessories.

Railroad Equipment—RAIL

342911	Transportation equipment hardware.
349301	Steel springs, except wire.
349302	Springs, torsion bar.
349904	Railroad track equipment, frogs, switches, etc., fabricated from steel rail.
353194	Railway maintenance equipment.
356612	Bearings, car journal.
366233	Railway signaling equipment.
374110	Locomotives, railroad—over the road.
374121	Locomotives, industrial.
374131	Locomotive parts, except underground mine.
374210	Passenger train cars, new.
374220	Freight train cars, new.
374231	Street, rapid transit, and interurban cars.
374232	Parts and accessories for railroad, street, and rapid transit cars, and trolley coaches.
420000	Railroad equipment repair services.

Shipbuilding—SHIP

353141	Winches, capstans, and windlasses, except special military design.
373001	Ship and boat parts and components, except special military design.
373111	Non-propelled ships, military.
373112	Non-propelled ships, except special military design.
373120	Self-propelled ships, military.
373130	Self-propelled ships, except special military design.
373160	Ship, repair, except special military design.
373201	Boats, military design.
373202	Boats, except special military design.
373241	Boat repair, military boats.
373242	Boat repair, civilian boats.

333120	Copper, refined.	335761	Appliance copper wire and cord (except flexible cord sets).
334120	Ingots, shot, and waffle, copper-base alloy.	335770	Magnet wire.
335110	Copper and copper-base alloy wire, bare and tinned for purposes other than electrical transmission.	335780	Power wire and cable.
335120	Brass mill products (except wire), including ammunition cups and discs.	335792	Other insulated copper wire and cable.
335720	Copper and copper-base alloy wire (including strand and cable) bare and tinned, for electrical transmission.	336200	Castings, copper and copper-base alloy.
		339914	Powder, copper, unalloyed; powder, copper-base alloy.

ELECTRICAL EQUIPMENT DIVISION—ELEC

326401	Poreclain electrical products, high voltage.	362910	Capacitors, except electronic components.
335763	Power supply cords, domestic and industrial.	362920	Rectifying apparatus.
361201	Power distribution and other transformers, including boosters, reactors, etc., except electronic components.	362930	Other industrial electrical products, n.e.c.
361210	Specialty transformers, except electronic components.	364201	Incandescent lighting fixtures, except specialties.
361301	Low voltage distribution equipment 1,200 volts and under.	364202	Fluorescent lighting equipment, except portable.
361302	Switchgear and switchboard apparatus over 1,200 volts.	364251	Street and highway lighting equipment.
361331	Fuses and fuse equipment, under 2,300 volts.	364252	Floodlighting and area lighting equipment.
362101	Motor-generator sets and other rotating equipment.	364254	Infra-red and ultra-violet lamp fixtures.
362102	Land transportation motors, generators and control apparatus.	364301	Current-carrying wiring devices, except connectors and protective devices.
362103	Motors, special aircraft.	364302	Connectors, Army and Navy type
362104	Synchro and servo devices.	364303	Connectors, transmission and distribution type (except Army and Navy type).
362110	Fractional horsepower motors.	364304	Choke coils and lightning arrestors, power circuit.
362121	Integral horsepower motors and generators, under 2,000 kw.	364410	Pole line and transmission hardware.
362160	Parts and supplies for motors, generators, and motor-generator sets.	364420	Electrical conduit.
362200	Industrial electrical control equipment, except railroad and automotive.	364430	Other noncurrent carrying wiring devices.
		366234	Electric street traffic signals.
		369100	Storage batteries.
		369202	Primary batteries, wet cell.

ELECTRONICS DIVISION—ETRX

Product Class Code	Description	Product Class Code	Description
344131	Towers, radio, prefabricated, except special design for military use and for commercial broadcast.	366261	Sonar and related devices.
365101	Household, portable and auto radio receivers, phonographs and recorders.	367100	Electron tubes, receiving types, except cathode ray.
365120	Television receivers, home type.	367200	Cathode ray tubes, TV picture type.
365130	Recorders, amplifiers, audio equipment, and accessories, commercial.	367301	Cathode ray tubes, except TV picture type.
365200	Phonograph records, record blanks, and pre-recorded magnetic tapes.	367302	Transmitting and special purpose electron tubes.
366211	Transmitters, radio communication.	367910	Transistors, crystal diodes, and similar solid state devices.
366212	Receivers, radio communication.	367920	Capacitors, electronic applications.
366213	Transceivers and transmitter-receivers, radio communication.	367930	Resistors, electronic applications.
366220	Broadcast equipment.	367940	Transformers, coils, and reactors, electronic applications.
366222	Industrial control equipment, electronic (including industrial TV).	367951	Filters, electronic applications.
366231	Intercommunication equipment, electronically amplified.	367952	Relays and switches, electronic applications.
366241	Navigational aids, electronic.	367953	Transducers and related products.
366242	Electronic systems equipment, military.	367954	Printed circuits, printed circuit boards and printed electronic subassemblies.
366251	Missile guidance equipment, electronic.	367955	Electronic components and subassemblies, consumer types.
366260	Commercial and industrial electronic equipment, n.e.c.	367956	Electron tube parts.
		367957	Electronic components and subassemblies, commercial, n.e.c.

FOOD INDUSTRIES DIVISION—FOOD

201000	Meat products industries.	208000	Beverage industries.
202000	Dairy products industries.	209000	Miscellaneous food preparations and kindred products industries.
203000	Canning and preserving fruits, vegetables and sea food industries.	211100	Cigarette industry.
204000	Grain-mill products industries.	212100	Cigar industry.
205000	Bakery products industries.	213100	Tobacco industry (chewing, smoking, and snuff).
206000	Sugar industries.	214100	Tobacco stemming and redrying industries.
207000	Confectionery and related products industries.	289121	Gelatin, edible.

FOREST PRODUCTS DIVISION

Lumber and Wood Products—LUMB

086100	Christmas trees.
241101	Logs, bolts, and other woods products (except pulpwood in cords).
242110	Rough lumber and sawed ties.
242120	Dressed lumber, excluding flooring
242170	Softwood cut stock.
242181	Softwood flooring.
242182	Other general sawmill and planing mill products.
242610	Hardwood flooring.
242621	Hardwood furniture dimension stock.
242622	Other hardwood dimension stock.
242623	Furniture parts and vehicle stock.
242901	Shingles and shakes.
242903	Excelsior products.
243100	Millwork, construction type products.
243210	Hardwood plywood.
243220	Softwood plywood, interior type.
243230	Softwood plywood, exterior type.
243240	Nonwood face plywood and other plywood type products.
243250	Hardwood veneer.
243260	Softwood veneer.
243311	Fabricated structural framing and wood laminates (except panels or sections for prefabricated buildings).
243313	Ready cut lumber for buildings.
244120	Box shook.
249110	Wood preserving.
249942	Cork products, except floor tile and floor covering.
249951	Wooden conduits, pipe, tank and vats.
249956	Wood products, n.e.c. (containing controlled materials).

249958	Wood products, except household, n.e.c.
266130	Hardboard.
345221	Timber connectors, grids, plates and rings.
398300	Matches.

Pulp, Paper, and Paperboard—PAPR

241102	Pulpwood, other than pulp logs.
261100	Pulp, wood and other.
262100	Paper mills, except building paper mills.
263100	Paperboard mills.
264100	Coated and glazed papers.
264200	Envelopes.
264501	Die cut paper and die cut or laminated paperboard products, except closures.
264621	Molded pulp plates, dishes and similar products.
264910	Stationery, tablets, and related products.
264920	Wrapping paper, including waterproof, impregnating, vapor barrier, crepe and gift.
264930	Sanitary and health products, paper.
264941	Sanitary napkins.
264942	Tampons.
264951	Paper rolls for adding and other business machines.
264952	Other converted paper and board products, except advertising novelties, containers, business machine supplies, patterns and playing cards.
265431	Stamped plates, dishes, spoons, forks, and similar products.
266122	Construction paper and board, except asbestos or tar saturated.

INDEX OF PRODUCT CLASS CODES BY BDSA INDUSTRY DIVISIONS

GENERAL INDUSTRIAL EQUIPMENT AND COMPONENTS DIVISION

General Components—GCOM

Product Class Code	Description	Product Class Code	Description
249954	Handles, wooden.	348120	Precision mechanical springs.
329320	Gaskets, all types.	348171	Wire cloth, industrial.
331520	Nails, spikes, brads, tacks, and staples, ferrous (not made in steel mills).	348193	Chain, welded and weldless.
339921	Nails, spikes, brads, and tacks, nonferrous.	349304	Springs, helical, hot wound, except automotive.
342301	Hand tools and accessories.	349402	Valves, industrial (including marine).
342321	Edge tools, except cutting dies.	349403	Valves, heating (including heating specialties).
342333	Files, rasps, and file accessories.	349404	Valves and tube fittings, aircraft type (AN).
342500	Hand saws, saw blades, and accessories.	349405	Pipe fittings, except cast iron fittings for cast iron pipe.
342912	Chain and rope fittings.	349406	Tube fittings, except aircraft type (AN).
342955	Hose clamps, couplings, and nozzles (other than fire).	349407	Piping accessories.
342956	Casters and wheels, industrial.	349408	Valves, miscellaneous, n.e.c.
342958	Fire protection system components.	349906	Permanent magnets.
344322	Steel plate weldments, n.e.c.	356200	Ball and roller bearings and components.
345100	Screw machine products, nonstandard.	356601	Mechanical power transmission equipment, n.e.c.
345201	Bolts, nuts, and other industrial fasteners, ferrous and nonferrous.	356611	Plain bearings and bushings.
346132	Stamped, spun and pressed metal products, n.e.c.	356621	Gears and gear drives, industrial.
346133	Sheet metal, perforated, embossed, or patterned.	356631	Power transmission chain: roller, silent, conveyor, and special types.
346185	Hand tool boxes, stamped, metal.	359903	Bellows, flexible metal hose and tubing.
		399934	Name plates, panels and identification tags, ferrous and nonferrous.

General Industrial Equipment—GIEQ

353402	Elevators and moving stairways.	355953	Selected special-industry machinery and equipment, n.e.c.
353501	Conveyors and conveying equipment, except farm elevators and mine type.	355954	Metal coating, degreasing, and washing equipment.
353613	Cranes and hoists (except construction, overhead traveling, truck body mounted, and utility).	355955	Special-industry machinery and equipment, n.e.c.
353620	Overhead traveling cranes and monorail systems.	356101	Industrial pumps (includes mobile pumping units).
353700	Industrial trucks, tractors, trailers, and equipment.	356102	Compressors and dry vacuum pumps.
354231	Can, drum, and barrel making machinery.	356152	Industrial spraying equipment.
355110	Dairy and milk products plant machinery and equipment.	356401	Industrial fans and blowers.
355121	Bakery machinery and equipment.	356731	Furnaces, ovens, and kilns, except metal processing.
355131	Beverage machinery process equipment, except dairy.	356902	Gas generating and producing equipment.
355132	Vegetable, fruit, meat, and poultry packing and processing machinery.	356903	General industrial equipment, n.e.c.
355133	Sugar, flour and grain mill machinery.	356904	Packaging and wrapping machines, except food and tobacco, n.e.c.
355134	Other industrial food products machinery, n.e.c.	358501	Compressors, condensing units and refrigeration equipment, n.e.c.
355200	Textile machinery.	358511	Air conditioners, packaged room.
355310	Woodworking machinery, except home workshop.	358531	Commercial refrigerated food equipment, except beverage and coin operated.
355400	Paper-industries machinery.	358532	Industrial and scientific unitary refrigeration equipment.
355501	Printing-trades machinery and equipment.	358540	Compressors and compressor units, refrigeration and air-conditioning.
355910	Chemical manufacturing industries machinery and equipment.	358550	Condensing units, refrigeration and air-conditioning.
355930	Plastics-working machinery and equipment.	358573	Refrigeration and air-conditioning equipment, n.e.c.
355941	Rubber processing machinery and equipment.	359904	Cylinders, hydraulic, air and oil.
355942	Tire repairing and retreading equipment.	363602	Sewing machines, industrial, except shoe sole stitching.
355952	Ammunition and explosives loading machinery and equipment.	396421	Industrial knitting and sewing machine needles.
		398131	Brushes, power driven.

IRON AND STEEL DIVISION—STEE

Product Class Code	Description
	Pig iron.
	Sponge iron and other direct reduction iron.
	Powder.
	Scrap
	Steel Mill products (carbon, alloy, and stainless).
	Ingots.
	Semi-finished—blooms, slabs, billets, sheet bars, tube rounds, skelp and wire rods.
	Structural shapes and piling.
	Plates.
	Rails and track accessories.
	Wheels and axles.
	Bars and bar size shapes.
	Tool steel.
	Pipe and tubing, except cast iron pipe.
	Wire, drawn.
	Wire products—nails and staples, barbed wire, fencing, bale ties and baling wire, wire rope and strand.
	Tin mill products—tin plate, terne plate, tin mill black plate.
	Sheets and strip.
	Castings—gray iron, malleable iron and steel.
	Forgings—iron and steel.

Nonferrous Metals, Alloys, including Ferroalloys, Powder, Scrap and Compounds

Product Class Code	Description
	Boron.
	Calcium.
	Chromium.
	Cobalt.
	Ferrocolumbium and ferrocolumbium tantalum.
	Ferronickel.
	Ferrophosphorus.
	Ferrotitanium.
	Manganese.
	Molybdenum.
	Tungsten.
	Vanadium.

Refractories

Clay.
Nonclay, except carbon and graphite.

LEATHER, SHOES AND ALLIED PRODUCTS DIVISION—LEAT

Animal hair.
Belting, leather.
Belts, waist.
Boot and shoe findings, metal and wood.
Boot and shoe findings, other than metal, wood, or rubber.
Curled hair.
Fur plates.
Furs, dressed and dyed.
Furs, raw, all types.
Gloves, dress, leather.
Gloves, work, leather.
Handbags and purses.
Harness and saddlery hardware.
Hatters' fur.

Hides and skins, all types.
Industrial leather, including grease cups, packings, etc.
Industrial products of leather and part leather, other.
Leather, all types.
Leather novelties.
Luggage.
Luggage hardware.
Saddlery and harness.
Shoe lasts and related products.
Shoe polish and cleaners.
Shoes, except rubber.
Slippers, other than rubber.
Small leather goods.
Tanning extracts, all types.
Tanning raw materials: bark, wood, leaves, and nuts.
Upholstery filling, curled hair.

METAL WORKING EQUIPMENT DIVISION—MWEQ

329101	Nonmetallic abrasive products.
329141	Metal abrasives, except metal scouring pads.
339911	Thermit, except for military use.
342322	Cutting dies, except metal cutting.
348192	Gas welding rods and metallizing wire.
354101	Machine tools, except rebuilt machine tools, and home workshop.
354102	Machine tools, metalworking, home workshop, nonport- able.
354192	Rebuilt machine tools.
354201	Metalworking machinery, n.e.c.
354221	Metalworking presses, except forging.
354410	Jigs, fixtures, punches, dies, die sets, and subpresses.
354420	Industrial molds.
354510	Cutting tools for machine tools and metalworking machinery.
354520	Gages and precision measuring tools.
354530	Metalworking equipment attachments and accessories, n.e.c.

354801	Rolling-mill machinery.
354821	Power-driven hand tools, industrial, pneumatic, and electric, portable.
354822	Power-driven hand tools, home workshop.
354830	Acetylene welding and cutting apparatus.
355320	Woodworking machinery, nonportable, home workshop.
355921	Foundry machinery and equipment.
355922	Ladles for steel mills.
356500	Industrial patterns.
356711	Electric furnaces, metal processing.
356721	Fuel-fired industrial furnaces, metal processing.
356722	Steel mill furnaces (blast, open hearth, etc.).
356732	High-frequency induction and dielectric heating ap- paratus.
356733	Industrial electrical heaters and heating units, n.e.c.
356734	Industrial furnace repair parts and attachments.
362310	Arc welding machines and components, except electrodes.
362320	Welding wire and rods.
362330	Resistance welders, components, and electrodes.

MISCELLANEOUS METALS AND MINERALS DIVISION—MSMN

Product Class Code	Description	Product Class Code	Description
	Abrasives, artificial (lump, grain, powder, flour and compounds): silicon carbide, aluminum oxide, boron carbide.		Mica, natural and synthetic: sheet, block, film, splittings, scrap, and mica products.
	Abrasives, natural (crude, lump, grain, powder, flour, and compounds): corundum, emery, garnet, and tripoli.		Mineral wool and mineral wool products.
	Antimonial lead: metal, castings, and scrap.		Mullite.
	Antimony: ore, concentrates, and metal.		Nickel and nickel-base alloys: primary shapes and forms, mill products, castings, powder and scrap.
	Asbestos fiber, and asbestos products.		Perlite, crude, and ground or treated.
	Babbitt metal.		Precious metals (gold, silver, and platinum-group metals): ores, refined metals, bullion, mill products, leaf, and scrap.
	Barite, crude, crushed, or ground.		Pumice and pumicite.
	Beryl ore.		Pyrophyllite, crude and ground.
	Beryllium: concentrates, oxide, and metal.		Quartz, crude.
	Bismuth: metal and alloys.		Radium ores.
	Cadmium: metal and alloys.		Rare-earth metals: ores and concentrates.
	Calcite, optical, crude.		Ruby, uncut, natural and synthetic.
	Carbon products.		Rutile: ore and concentrates.
	Celestite, crude.		Sapphire, uncut, natural and synthetic.
	Chalk, crude, and ground or treated.		Selenium: metal, scrap, dioxide and ferro-selenium.
	Clay: ball clay, bentonite, fire clay, fuller's earth, and kaolin.		Sillimanite.
	Cryolite, natural and synthetic.		Soapstone, crude.
	Diamonds: industrial and rough gem stones.		Spodumene, crude.
	Diatomaceous earth.		Steatite talc, crude, block and ground.
	Feldspar, crude, concentrates, and ground.		Talc, crude, block and ground.
	Fibrous glass.		Tantalite: ore and concentrates.
	Fluorspar.		Tantalum metal.
	Germanium.		Tellurium.
	Graphite and graphite products.		Thorium.
	Hafnium.		Tin: ore, concentrates, metal, alloys, solder, mill products, foil, powder, and scrap.
	Ilmenite: ore and concentrates.		Titanium: ores, concentrates, sponge, metal, alloys, mill products, castings, powder, and scrap.
	Indium.		Uranium ores.
	Kyanite.		Vermiculite.
	Lead: ores, concentrates, metal, alloys, solder, mill products, castings, foil, powder, and scrap.		Witherite, crude.
	Lime, Vienna, flour, superfine and grain.		Zinc: ores, concentrates, metal, alloys, dust, mill products, castings, foil, powder, and scrap.
	Magnesite: ore, caustic-calcined, and dead-burned grain.		Zircon, crude.
	Meerschaut.		Zirconium: ores, concentrates, sponge, metal, and mill products.
	Mercury: Ores, metal, and scrap.		

POWER EQUIPMENT DIVISION—POWER

331763	Heavy riveted pipe.	344361	Vessels, pressure, for process use (not field erected).
343367	Mechanical stokers, 1,201-pounds capacity and over.	349801	Fabricated metal piping.
344311	Heat exchangers.	351101	Steam and hydraulic turbines, and steam engines.
344312	Steam condensers and auxiliary air ejectors.	351111	Gas turbine and parts.
344321	Pipe over 36" O.D., fabricated from steel plate.	351901	Internal combustion engines, 750 r.p.m. and under.
344330	Power boilers and repair parts.	355951	Petroleum refinery machinery and equipment.
344342	Boiler shop products, n.e.c.	356402	Soot blowers.
344344	Nuclear reactors.	356622	Gears, ship propulsion.
344352	Heavy metal tanks, atmospheric (not field erected).	358921	Water softeners and water conditioning equipment.
344353	Heavy metal tanks, pressure, not for process use (not field erected).	362122	Generators, A.C. 2,000 kw. and over.
344354	Heavy metal tanks, bolted.	362140	Prime mover generator sets, Diesel, natural gas, dual-fuel engine driven, gasoline-engine driven, starter carts; aircraft, wind driven.
344355	Oil or water storage tanks, field erected.		

PRINTING AND PUBLISHING DIVISION—PRIN

264400	Wallpaper.	275100	Commercial printing, except lithographic.
271100	Newspapers.	275200	Commercial printing, lithographic.
272100	Periodicals.	275300	Engraving and plate printing.
273100	Books and pamphlets.	276100	Manifold business forms manufacturing.
273200	Book printing.	277110	Greeting cards.
274110	Catalogs and directories.	278210	Blankbook making and paper ruling.
274121	Business service publications (containing controlled materials).	278220	Library and loose-leaf binder and manufacturing.
274131	Miscellaneous publishing (containing controlled materials).	278900	Bookbinding and miscellaneous related work.
274132	Miscellaneous publishing (not containing controlled materials).	279100	Typesetting.
		279300	Photoengraving.
		279400	Electrotyping and stereotyping.
		355521	Printing plate blanks.
		399321	Advertising displays.

SCIENTIFIC MOTION PICTURE AND PHOTOGRAPHIC PRODUCTS DIVISION

Motion Picture and Photographic Products—MOTP

Product Class Code	Description
383101	Photographic lenses.
386101	Photographic reproduction equipment.
386102	Motion picture theater; studio, laboratory and still photography equipment.
386103	Motion picture and still picture equipment (personal use).
386150	Photographic sensitized film and plates.
386160	Sensitized photographic paper and cloth, silver halide type.
386170	Sensitized photographic paper and cloth, other than silver halide type.
386180	Prepared photographic chemicals.

Scientific and Technical Equipment—SITE

349401	Automatic regulating valves.
349901	Bells, gongs, sirens, and similar devices.
361110	Integrating instruments, electrical.
361122	Electric and electronic test, measuring and monitoring instruments and equipment.
361131	Electrical measuring instruments, n.e.c.
366235	Alarm and signaling systems, electric, n.e.c.
369301	X-ray equipment and X-ray tubes.
369302	Electro-therapeutic apparatus and electro-medical treatment apparatus.

Product Class Code	Description
381110	Selected aircraft flight instruments.
381121	Professional furniture, n.e.c.
381122	Laboratory balances.
381123	Navigation instruments, except aircraft.
381124	Laboratory apparatus and scientific instruments, other than optical.
381125	Surveying and drafting instruments.
382111	Aircraft instruments, except flight.
382120	Integrating meters, non-electrical type.
382130	Industrial process instruments.
382161	Radiation detection devices.
382162	Mechanical measuring instruments, n.e.c.
382200	Automatic temperature controls, domestic.
383102	Optical instruments.
384101	Surgical and medical instruments.
384102	Medical and surgical equipment and supplies.
384103	Surgical and medical furniture.
384211	Surgical, orthopedic, and prosthetic appliances and supplies.
384212	Surgical dressings and bandages.
384230	Personal safety devices.
384240	Electrical hearing aids.
384300	Dental instruments, equipment, and supplies.
385100	Ophthalmic goods and instruments.
387100	Watches, clocks, and parts, except watchcases.
387200	Watchcases.
399910	Fire extinguishers.

TEXTILES AND CLOTHING DIVISION—TEXT

Apparel, not elsewhere classified.
Belts.
Brassieres and bandeaux.
Canvas products (not containing controlled materials).
Carpets and rugs, n.e.c.
Cloth hats and caps.
Corsets, girdles, roll-ons, and garter belts.
Cotton broad-woven fabrics.
Curtains and draperies.
Dress and semidress gloves and mittens (fabric, fabric and leather combined).
Dresses, blouses, waists, and shirts—girls', children's, and infants'.
Dresses, dozen price.
Embroideries.
Feathers and down.
Felt goods.
Fiber cordage and twine.
Finishing textiles, except wool.
Full-fashioned hosiery mills.
Fur-felt hats and hat bodies.
Fur goods.
Girls', children's and infants' outerwear, n.e.c.
Glass textile fibers.
Handkerchiefs.
Hat and cap materials.
Housefurnishings, fabric (containing controlled materials).
Housefurnishings, n.e.c.
Jute goods.
Knit fabric mills.
Knit outerwear mills.
Knit underwear mills.
Lace goods.
Leather and sheep lined clothing.
Linen goods.
Men's and boys' clothing, n.e.c.
Men's and boys' neckwear.
Men's and boys' underwear, woven fabric and purchased knit fabric.
Men's and boys' suits and coats.

Men's dress and sport shirts and nightwear, woven fabric and purchased knit fabric.
Millinery.
Narrow fabric mills.
Paddings and upholstered filling (except curled hair).
Parachutes.
Processed textile waste and recovered fibers.
Raincoats and other waterproof outer garments.
Rayon, acetate, noncellulosic synthetic fibers, and related products.
Rayon and related broad-woven fabrics.
Robes and dressing gowns.
Schiffli-machine embroideries.
Secured wool and other products of scouring and combing plants.
Seamless-hosiery mills.
Separate dress and sport trousers, men's and boys'.
Straw hats.
Suit and coat findings, men's and boys'.
Suspenders, garters, and related products.
Textile goods, not elsewhere classified.
Thread mills.
Thrown yarns.
Trimmings, stamped art goods and art needlework.
Tucking, pleating, and hemstitching.
Women's and children's underwear and nightwear, woven fabric and purchased knit fabric.
Women's and misses' blouses and waists.
Women's and misses' unit-priced dresses.
Women's, misses', and juniors' coats and skirts.
Women's, misses' and juniors' outerwear, n.e.c., woven fabric and purchased knit fabric.
Women's neckwear and scarfs.
Wool carpets, rugs, and carpet yarns.
Woolen and worsted fabrics (wholly or chiefly by weight of wool, reprocessed wool, or reused wool).
Wool-felt hats and hat bodies.
Work shirts, men's and boys'.
Yarn mills, cotton system.
Yarns spun on woolen and worsted systems, except of wool, carpet.
Yarn spun on silk system.

WATER AND SEWERAGE INDUSTRY AND UTILITIES DIVISION—WATR

NOTE: This Division has cognizance of all water and sewerage systems publicly or privately owned that operate as public utilities. It serves as claimant in their behalf for construction projects and for their maintenance and operating needs. It is responsible for the planning required to assure the maintenance of these essential services in emergencies, and serves as a focal point for the consideration of problems affecting industry.

SECTION IV-A

LIST OF CONTROLLED MATERIALS

CARBON STEEL (INCLUDING WROUGHT IRON)¹

- (a) Bar, bar shapes, includes:
 - Bar, hot-rolled, stock for projectile and shell bodies.²
 - Bar, hot-rolled, other (including light shapes).
 - Bar, reinforcing (straight lengths—as rolled).
 - Bar, cold-finished.
- (b) Sheet, strip (uncoated and coated), includes:
 - Sheet, hot-rolled.
 - Sheet, cold-rolled.
 - Sheet, galvanized.
 - Sheet, all other coated.
 - Sheet, enameling.
 - Roofing, galvanized, corrugated, V-crimped channel drains.
 - Ridge roll, valley, and flashing.
 - Siding, corrugated and brick.
 - Strip, hot-rolled.
 - Strip, cold-rolled.
 - Strip, galvanized.
 - Electrical sheet and strip.
 - Tin mill black plate.
 - Tin plate, hot-dipped.
 - Ternes, special coated manufacturing.
 - Tin plate, electrolytic.
- (c) Plate.³
- (d) Structural shapes,⁴ piling.
- (e) Pipe, tubing—seamless and welded,⁵ includes:
 - Standard pipe (including type of couplings furnished by mill).⁶
 - Oil country goods (casing, tubing and drill pipe, including type of couplings furnished by mill).
 - Line pipe (including type of couplings furnished by mill).
 - Pressure tubing.
 - Mechanical tubing.
- (f) Wire, wire products, includes:
 - Wire—drawn.
 - Nails—bright steel wire, steel cut, galvanized, cement-coated, and painted.
 - Spikes and brads—steel wire, galvanized, and cement-coated.
 - Staples, bright and galvanized (farm and poultry).
 - Wire rope and strand.
 - Welded wire mesh and woven wire netting.
 - Barbed and twisted wire.
 - Wire fence, woven and welded (farm and poultry).
 - Bale ties.
 - Coiled automatic baler wire.
- (g) Tool steel (all forms including die blocks and tool steel forgings).
- (h) Other mill forms and products (excluding castings and forgings), includes:
 - Ingots.
 - Billets, for shell body stock only.⁷
 - Billets, for shell component parts and rockets.
 - Blooms, slabs, other billets, tube rounds, sheet bars.
 - Skelp.
 - Wire rod.
 - Rails.
 - Joint bars (track).
 - Tie plates (track).
 - Track spikes.
 - Wheels, rolled or forged (railroad).
 - Axles (railroad).

ALLOY STEEL⁸ (EXCEPT STAINLESS STEEL⁹).

- (a) Bar, bar shapes, includes:
 - Bar, hot-rolled stock for projectile and shell bodies.
 - Bar, hot-rolled, other (including light shapes).
 - Bar, cold-finished.
- (b) Sheet, strip, includes:
 - Sheet, hot-rolled.
 - Sheet, cold-rolled.
 - Sheet, galvanized.
 - Strip, hot-rolled.
 - Strip, cold-rolled.
- (c) Plate,¹⁰ includes:
 - Rolled armor.
 - Other.
- (d) Structural shapes.⁴
- (e) Pipe, tubing—seamless and welded,⁵ includes:
 - Oil-country goods.
 - Pressure tubing.
 - Mechanical tubing.
- (f) Wire.
- (g) Tool steel (all forms including die blocks and tool steel forgings).
- (h) Other mill forms and products (excluding castings and forgings), includes:
 - Ingots.
 - Billets, projectile and shell stock.
 - Blooms, slabs, other billets, tube rounds, sheet bars.
 - Wire rods.
 - Rails.
 - Wheels, rolled or forged (railroad).
 - Axles (railroad).

STAINLESS STEEL⁹

- (a) Bar, bar shapes, includes:
 - Bar, hot-rolled (including light shapes).
 - Bar, cold-finished.
- (b) Sheet, strip, includes:
 - Sheet, hot-rolled.
 - Sheet, cold-rolled.
 - Strip, hot-rolled.
 - Strip, cold-rolled.
- (c) Plate.¹¹
- (d) Structural shapes.⁴
- (e) Pipe, tubing—seamless and welded,⁵ includes:
 - Pipe.
 - Pressure tubing.
 - Mechanical tubing.
- (f) Wire, wire products, includes:
 - Wire, drawn.
 - Wire rope and strand.
- (g) Other mill forms and products (excluding castings and forgings), includes:
 - Ingots.
 - Blooms, slabs, billets, tube rounds.
 - Sheet bars, wire rods.

COPPER AND COPPER-BASE ALLOY BRASS MILL PRODUCTS¹²

- Copper (unalloyed):
 - (a) Bar, rod, shapes, wire (except electrical wire).
 - (b) Sheet, strip, plate, rolls.
 - (c) Pipe, tube (seamless).
- Copper-base alloy:¹³
 - (a) Bar, rod, wire, shapes.
 - (b) Sheet, strip, plate, rolls, military ammunition cups and discs.
 - (c) Pipe, tube (seamless).

COPPER WIRE MILL PRODUCTS

All copper wire and cable for electrical conduction, including but not limited to:

- Bare and tinned.
- Weatherproof.
- Magnet wire.
- Insulated building wire.
- Paper and lead power cable.
- Paper and lead telephone cable.
- Asbestos cable.
- Portable and flexible cord and cable.
- Communication wire and cable.
- Shipboard cable.
- Automotive and aircraft wire and cable.
- Insulated power cable.
- Signal and control cable.
- Coaxial cable.

Copper-clad steel wire containing over 20 percent copper by weight regardless of end use.

COPPER AND COPPER-BASE ALLOY FOUNDRY PRODUCTS AND POWDER

Includes:

Copper, brass, and bronze castings.¹⁴

¹ For the purpose of this schedule "carbon steel (including wrought iron)" means any steel customarily so classified and also includes: (1) Ingot iron; (2) all grades of electrical sheet and strip; (3) low-alloy, high-strength steels; (4) clad and coated carbon steels not included with alloy steels: e.g., galvanized, tin, terne, copper (excluding copper wire mill products) or aluminum clad and/or coated carbon steels; and (5) leaded carbon steels. "Low alloy, high-strength steels" means only the proprietary grades promoted and sold for this purpose, and Navy high-tensile steel grade HT Specification Mil-S-16113 (Ships).

² Includes projectile body stock, sizes under 2 $\frac{3}{8}$ inches.

³ Carbon plate not only includes the following specifications, but also floor plates of any thickness:

- 0.180 inch or thicker, over 48 inches wide.
- 0.230 inch or thicker, over 8 inches wide.
- 7.53 pounds per square foot or heavier, over 48 inches wide.
- 9.62 pounds per square foot or heavier, over 8 inches wide.

⁴ "Structural shapes" means rolled flanged sections having at least one dimension of their cross section 3 inches or greater, commonly referred to as angles, channels, beams, and wide flange sections.

⁵ Steel pipe or tubing exceeding 36 inches O.D. is not a controlled material, but is a Class A product.

⁶ Standard pipe includes the following:

- Ammonia pipe.
- Bedstead tubing.
- Driven well pipe.
- Drive pipe.
- Dry kiln pipe.
- Dry pipe for locomotives.
- English gas and steam pipe.
- Fence pipe.
- Furniture pipe.
- Ice machine pipe.
- Mechanical service pipe.
- Nipple pipe.
- Pipe for piling.
- Pipe for plating and enameling.
- Pump pipe.
- Signal pipe.
- Standard pipe coupling.
- Structural pipe.
- Turbine pump pipe.
- Water main pipe.
- Water well casing.
- Water well reamed and drifted pipe.

⁷ Includes only projectile body stock, sizes 2 $\frac{3}{8}$ inches and larger rounds, and round-cornered squares.

COPPER AND COPPER-BASE ALLOY FOUNDRY PRODUCTS AND POWDER—Continued

Includes:

Copper, brass, and bronze powder (including copper powder, granular and flake, and copper-base alloy powder, granular and flake).

ALUMINUM

- Rolled bar, rod, structural shapes, and bare wire.
- Aluminum conductor steel reinforced (ACSR) and bare aluminum cable.
- Insulated or covered wire or cable.
- Extruded bar, rod, shapes, and tube (extruded, drawn and welded tube).
- Sheet and plate.
- Pig or ingot, granular or shot, and molten metal.
- Foil.
- Powder, flake, paste.

NICKEL ALLOYS¹⁵

- Ingots, blooms, slabs, and billets.
- Plate, sheet, strip, and foil.
- Rods, bars (including anode bars), pipe, tubing, and shapes.
- Wire and wire rod.
- Powder (produced mechanically from nickel shot).

⁸ For purposes of this schedule "alloy steel" means steel containing 50 percent or more of iron or steel and any one or more of the following elements in the following amounts: Manganese, maximum of range in excess of 1.65 percent; silicon, maximum of range in excess of 0.60 percent (excepting electrical sheet and strip); copper, maximum of range in excess of 0.60 percent; aluminum, boron, chromium (less than 10 percent), cobalt, columbium, molybdenum, nickel, tantalum, titanium, tungsten, vanadium, zirconium, or any other alloying elements in any amount specified or known to have been added to obtain a desired alloying effect. Clad steels which have an alloy steel base or carbon steel base for which nickel and/or chromium is contained in the coating or cladding material (e.g., inconel, monel, or stainless) are alloy steels.

⁹ "Stainless steel" means heat- and corrosion-resisting steel containing 50 percent or more of iron or steel and 10 percent or more of chromium whether with or without nickel, molybdenum, or other elements.

¹⁰ Alloy steel plate includes the following specifications:

- 0.180 inch or thicker, over 48 inches wide.
- 0.230 inch or thicker, over 8 inches wide.
- 7.53 pounds per square foot or heavier, over 48 inches wide.
- 9.62 pounds per square foot or heavier, over 8 inches wide.

¹¹ Stainless steel plates include the following size specifications: $\frac{3}{16}$ inch (0.1875) or thicker, over 10 inches wide.

¹² Includes anodes—rolled, forged, or sheared from cathodes.

¹³ "Copper-base alloy" means any alloy in the composition of which the percentage of copper metal equals or exceeds 40 percent by weight of the metallic content of the alloy. It does not include alloyed gold produced in accordance with U.S. Commercial Standard CS 67-38.

¹⁴ Cast copper and copper-base alloy shapes or forms suitable for ultimate use without remelting, rolling, drawing, extruding, or forging. (The process of casting includes the removal of gates, risers, and sprues, and sandblasting, tumbling, and dipping, but does not include any further machining or processing. For centrifugal castings the process includes the removal of the rough cut in the inner and/or outer diameter before delivery to a customer.) Castings include anodes cast in a foundry or by an ingot maker.

¹⁵ "Nickel alloys" means those alloys for which the specified nickel content is 5 percent or more up to and including pure nickel, and which do not contain as much as 50 percent of iron or steel, nor as much as 40 percent of copper, nor as much as 50 percent of aluminum. It does not include primary nickel in the forms of electrolytic cathodes, pigs, rondelles, cubes, pellets, shot, oxide (including sintered oxide), salts, or chemicals; nor does it include primary nickel in the form of ingots used for remelting or powder derived directly from ore concentrates.

IDENTIFICATION SYMBOLS BY MAJOR PROGRAMS

The program identification symbols listed in this schedule are the only ones authorized for use under the Defense Materials System. The symbols are not listed in alphabetical or numerical sequence but are grouped by Allotting Agencies. Within each group, the Allotting Agencies listed in Column 3 are authorized to make allotments under one or more of the programs listed in column 2 and to assign allotment numbers and ratings containing one or more of the program identifications listed in Column 1. The full names of the Allotting Agencies shown by initials in the following list are:

AEC—Atomic Energy Commission.
 BDSA—Business and Defense Services Administration.
 CIA—Central Intelligence Agency.
 FAA—Federal Aviation Agency.
 NASA—National Aeronautics and Space Administration.

SECTION IV-C

PARTIAL LIST A PRODUCTS (of particular interest to the Department of Defense)

Following is a list of items that have been individually determined to be Class A products. They are representative of items that ordinarily fall in a generic group of Class B products but are of unique military design or have unusual characteristics of production or distribution that warrant A product treatment. This is not an exhaustive list and items with similar characteristics may be the subject of future administrative determination.

Air conditioning units, jet aircraft.
Airframes.
Ammunition, small arms (all types), military, treated as Class A products.
Amplifiers, 1 kw., special Air Force design.
Amplifiers, stabilization and computer, used in A-1A bombing and navigational computer.
Antenna filters, used when a single antenna is used for UHF communication, IFF equipment and homing equipment.
Anti-icing units for jet engines.
Automatic hovering and depth control equipment for submarines.
Battery charger, special military design for torpedo batteries.
Bomb dolly, 12,000-pound capacity.
Bomb hoists, installed in aircraft.
Bomb hoists, ground handled.
Booster, ammunition.
Buckles, brass, service belt.
Buckles, metal (for web belt).
Buttons, special military insignia type.
Cable sets, automotive and aircraft (installed as original equipment).
Capstan, ship, special military design.
Carburetors, engine, aircraft.
Carburetors, special military design, for aircraft engines No. 335-30W and 4360-59.
Case, instrument, field test, for carrying aircraft instrument testing equipment.
Casket, metal, seamless, without inner seal, special military design.
Chamber, bubble, for sextants.
Chassis, radio receiver (custom made).
Chest, outfit, officers' mess, M-1937.
Chocks, wheel, metal, collapsible, aircraft.
Chutes, link ejecting.
Clip, end (for web belt).
Coil, assemblies, vibrator, engine starting, aircraft.
Coil assemblies, ignition, aircraft.
Coil assemblies, induction, aircraft.
Compass adapter, G2, for stabilizing airborne radar and equipment in azimuth.
Components for helmet liner M-1, special military design.
Compressor, air, 4 stage, 2 CFM, 3,000 p.s.i., for sonabouy rotor ejectors, special military design.
Compressors, aircraft.
Connectors, electrical, for rockets.
Console, communication, CIC, Navy shipboard.
Console, ship control, Navy.
Container, spark plug, aluminum, aircraft.
Containers, steel, cargo, special military design.
Control cubicle, Navy ship propulsion.
Converter unit, liquid oxygen, for jet aircraft.
Cot, folding, steel, special military design.
Cranes, Navy, aircraft crash, mobile.
Cranes, Navy boat handling.
Cranes, Navy paravane.
Cylinders, oxygen, special military design, mounted in aircraft.
Cylinders, helium storage, special military design.
Dehumidifier, electric, submarine.
Dispensers, cable, special military design, for dispensing steel torsionless cable at high speed for pulling triggers on moving bodies or aircraft ejection seats.
Divider, voltage, TS 89A/AT, for radar.
Drum, steel, 5-gallon, military.
Duplicator, spirit process, map reproduction, 22" x 29", special military design for field use.
Dust covers, aluminum, for radio, aircraft.
Ejector, cartridge, photoflash, aircraft.
Electric power plant, self-propelled, for starting jet engines.
Elevator, aircraft, shipboard.
Elevators, Navy shipboard.
Engine, gasoline, liquid cooled, for LVT's (installed as original equipment).
Engines and repair parts, aircraft.
Equipment, military, experimental.
Exciter regulator, aircraft, special military design.
Exhaust nozzle actuator, jet aircraft.
Fittings, quick disconnect, combination, aircraft.
Flanges, fuel cell, aircraft, installed as original equipment.
Food handling and storage equipment, aircraft.
Frames for shelter, field maintenance, type A-1A, aircraft.
Fuel caps, adapters and brackets for aircraft.
Fuel control, jet aircraft.
Fuel injection systems, aircraft.
Fuel metering systems and components for jet aircraft.
Furniture, aluminum, Navy shipboard use.
Gas turbines, main propulsion and auxiliary, special military design.
Gunnery armament container case.
Gyro compass systems, special military design.
Harness sets, except ignition, for original equipment or repair and replacement.
Heater (Hunter Model UH-58-SC-1, film dryer).
Heater, solar.
Hose, special in-flight refueling, aircraft.
Indicator, airspeed, for jet aircraft.
Intercooler, aircraft.
Inverter, electronic, type D2 power supply (not rotary type).
Jig plate castings, aluminum.
Junction box J229, containing integral parts used in navigation set ARN14.
Junction box, w/cable assembly incorporated therein, aircraft.
Kit, test (engine tuneup) special military design.
Lighting and power distribution system, portable, shipboard use.
Locking pins, for military trucks and tanks.
Magazine, wire recording, special military design.
Mast, telescope, special military design.
Military insignia and decorations, purchased as such by the military.
Nitrogen cylinders, special military design, used in guided missiles program.
Oscillator, frequency control, special military design.
Oxygen bracket, aircraft.
Patch cords (wiring harness for test benches) installed as original equipment.
Patch cords (wiring harness for test benches) repair or replacement.
Piston pin, Hercules DNX Diesel engine No. 71216A, installed as original equipment.
Portable hydrant refueling system, air installation.
Power control, electronic, jet engine (fuel metering system).
Powerplant, C-25, for air transportable radar beacon.

Power unit, airborne, F5 (for starting jet engine).
 Power units, electric auxiliary, airborne.
 Processing machines, photographic, automatic for 16 and 35 MM aerial film.
 Projector, motion picture, 16 MM (special military design).
 Propellers and parts, aircraft.
 Propulsion units, 165 hp. for propelling nested pontoons.
 Pump, oil circulation, for jet engine.
 Rack, folding tool pack, parachute.
 Rack, pallet, special military design.
 Radio, cell-type, screen room.
 Radio set, AN/TRC-24, UHF.
 Reduction gears for diesel engines.
 Reel, cable, nonmagnetic.
 Refrigerating unit, mechanical, gasoline driven, f/600 cu. ft., sectional portable refrigerator, including concurrent spares, special military design.
 Retro pneumatic ejector.
 Runway lighting leads, searchlight, AN/AVQ2A, aircraft.
 Sanitary equipment, aircraft.
 Seat assembly, troop scat.
 Seat, ejection, aircraft.
 Seat, tool, folding, lap and chest pack, parachute.
 Seat, troop.
 Semitrailer, low bed, front loading, 20 tons, special military, rear loading, 25 and 60 tons.
 Separator lines, large, parachute (aluminum).
 Signal amplifier system, for in-flight refueling operation.
 Skis, aircraft.
 Socket, wire rope, galvanized dropped forged steel, special Navy design for antisub nets.
 Solenoids, armament, aircraft.
 Sound recorder-reproducer type IC/VRT-5MS.
 Stand, aircraft maintenance, type C-1, for use on tail assembly.
 Stand, folding, for field desk.
 Stand, test, hydraulic system, gasoline engine driven.
 Starter, jet aircraft, military only.
 Static converter, E-1.
 Steel form, special military design, for underground magazine and left in place.
 Stereoscope, special military.
 Surge boots used on IFR, boom assembly to absorb shock or surge in fuel lines.
 Switch, absolute pressure, aircraft.
 Switch, impact, time delay, aircraft.

Switchboard, fire control, Navy shipboard use.
 Switchboards, special Navy Shipboard for interior communication.
 Synchronizer, propeller, aircraft.
 Table, work, cook's, w/pan rack (special military design).
 Table, work, kitchen (special military design).
 Tank, starting, for Navy diesel engine.
 Tank, water storage, nylon, special military design.
 Test bench sets, fly-away maintenance for A-1A computer.
 Tester, battery starter, model YM-20, special military design.
 Tester, coil, model AAM-5, special military design.
 Tester, condenser, model BM-5, special military design.
 Tester, dwell tach, model GAN-7, special military design.
 Tester, volts ampere, model CBM-12, special military design.
 Toilet assembly, aircraft.
 Tow hook, for military trucks and tanks.
 Towing bar, airplane, nose wheel.
 Tractor, towing, aircraft type A-1 and A-2.
 Trailer, airdrome utility, 4-wheel, type F-2.
 Trailer, cargo, 1½-ton, 2-wheel DT, 10' body, Ord. M-105, *body only*.
 Trailer, oxygen servicing, type E-3.
 Trailer, special military design for mounting air compressors, generators, and floodlights.
 Trailer, utility, type K-1, 3-wheel, for air force flight line.
 Trailer, utility, 2-wheel, pole type, 2½-ton, Infantry raft equipment.
 Trailer, w/hoist, bomb handling.
 Trailer, 2-wheel, pole type, 2½-ton, slip, w/bolster.
 Trailer, 4-wheel, special tandem, 10-ton, 4DT.
 Transmissions, aircraft.
 Trays, photographic, acid resistant, custom built.
 Truck, fire, crash type O-10.
 Truck, fire, crash types O-11 and O-11A.
 Truck, fire, crash type O-12.
 Truck, fire, foam, advance base type, special military design (Navy type).
 Tube, flexible chute, ammunition.
 Tuning drives, electronic.
 Vacuum chamber assembly, special military design USAF DWG No. 35G437.
 Valve, steering wheel metering, aircraft.
 Vehicle lashing gear w/quick release mechanism, special military design.
 Waterproof enclosures for remote control boxes and radio cases.
 Winches, Navy shipboard, special purpose use, non-magnetic.

The following *normal Class B products*, when installed as original equipment or concurrent spares on trucks, fire, crash, and on tactical or combat vehicles (which are classified as Class A products), are *considered Class A products* whether manufactured by the prime contractor in his own facility or purchased from subcontractors:

Axle assemblies	Engines
Brake assemblies	Wheel assemblies

Repair parts for combat vehicles which are not listed in the Class B Product List are to be considered Class A products; however, repair parts for engines, transmissions and final drives for combat vehicles are to be treated as Class B products. The following items are defined as combat vehicles:

- | | |
|--|--------------------------------|
| (1) Tanks, light, medium, heavy. | (7) Landing vehicle, tracked. |
| (2) Carriages, motor, self-propelled guns. | (8) Bulldozer, tank mounted. |
| (3) Carriages, motor, self-propelled howitzer. | (9) Trailer, gun mount. |
| (4) Wrecker, full track, tank mounted. | (10) Vehicle, armor, infantry. |
| (5) Tractor, cargo carrier. | (11) Vehicle, armor, engineer. |
| (6) Carrier, cargo, amphibious. | (12) Vehicle, tank recovery. |

SECTION IV-D

BDSA CLASSIFICATION AND CODING SYSTEM

The six-digit product classes shown in this publication conform to the 1957 edition of Standard Industrial Classification of the Bureau of the Budget and were developed from the five-digit product classes assigned by the Bureau of the Census for use in the 1958 Census of Manufactures and in subsequent Annual Surveys of Manufactures. To provide for BDSA requirements of product detail, a 6-digit class code number was used rather than the 5- or 7-digit numbers of the Bureau of the Census. However, the basic numbering system was not changed; the first four digits are the industry to which the product is assigned in the Standard Industrial Classification, the fifth digit (0-9) is the Census product class and the sixth digit uniquely identifies the BDSA product group. (Zero) is assigned as the sixth digit when BDSA and Census product groups are identical; 1 through 9, as the sixth digit indicates expansions of individual Census product classes required by BDSA. BDSA product groups which include more than one 1958 Census product class are assigned (zero) as the fifth digit, in the 6-digit code.

Individual products listed in Section I, the Product Assignment Directory, are assigned the code numbers of the product class in which they are included, except for selected basic chemicals, and chemical and rubber products. In order to assign individual codes to many chemicals and chemical and rubber products, it was necessary to expand the numbering system and to use as the first 4 digits of the 6-digit BDSA product class special 4-digit industry codes not listed in the Standard Industrial Classification. How these special 4-digit codes correspond with the Census industry classifications is shown in the following table:

<i>Item</i>	<i>BDSA Codes</i>	<i>Census Codes</i>
Inorganic chemicals.....	2881-2886	2819
Organic chemicals.....	2887-2889	2818
Rubber products, n.e.c.....	3061-3064	3069

As a result of administrative needs of BDSA it was necessary to assign to some individual products, product class codes which are not in agreement with the Standard Industrial Classification or the Census codes. The differences in industry classification between the BDSA product class codes and Census codes at the 4-digit level, except where noted below, are shown in the following table:
